

RIDWAN SHARIF

ridwanmsharif.github.io — ridwanmsharif@gmail.com — in/ridwanmsharif — github.com/ridwanmsharif

SUMMARY

- Experienced with distributed systems, databases, operating systems, infra, performance and backend
- Proficient in Go, C, C++, Ruby, Python, Lisp, Java, SQL; Rails, Docker, and gRPC

WORK EXPERIENCE

Google

Toronto, ON

Senior Software Engineer (Cloud Observability)

June '21 – Present

- Engineering lead of the managed OTEL and Prometheus teams, enabling over **\$100M+** in revenue
- Enabled Prometheus collection for Cloud Run, unlocking observability of **1M+** serverless workloads
- Responsible for scalable collection, storage and telemetry routing solutions for **GKE, GCE, Cloud Run**, and other compute environments
- OSS Core Contributor to OpenTelemetry and Prometheus, multiple time speaker at KubeCon ([1],[2])

Google

Sunnyvale, CA (remote)

Backend Engineering Intern (gVisor)

May – Sep '20

- Worked on expanding the gVisor kernel by supporting Linux compatible sandboxed FUSE filesystems
- Built the FUSE kernel module, device drivers, filesystem syscalls and the FUSE protocol in gVisor

Postmates / Uber

San Francisco, CA

Platform Engineering Intern (Delivery as a Service)

Jan – Apr '20

- Built the DaaS invoicing and billing system, reducing unrecoverable debt by **\$50,000+** annually
- Architected the debt collection service by integrating with BigQuery, GCS, Square, Shopify, Stripe

Cockroach Labs

New York, NY

Backend Engineering Intern (SQL Optimizer)

Sept '18 – Aug '19

- Added support for multi-table mutations, ordered aggregations, segmented sort and look-up joins
- Implemented index-skip-scans to improve index scan performance by an order of magnitude

Backend Engineering Intern (Distributed SQL)

- Designed and implemented load based splitting to replicate and distribute ranges of data across nodes
- Improved overall read/write throughput by over **60%** and **halved** end-to-end latency

Shopify

Ottawa, ON

Production Engineering Intern (Infrastructure)

Jan – Apr '18

- Led multiple engineering initiatives outlining measures to improve observability across Shopify
- Built incident report and cluster health tooling that was featured on the Shopify engineering blog

EDUCATION

University of Waterloo

Sept '16 – Apr '21

Bachelors of Computer Science, Honours (with Distinction)

RESEARCH

uWaterloo Database Systems Group

2018

Undergraduate Researcher (Prof. Grant Weddell)

Waterloo, ON

- Researched main-memory databases that use dynamic code-generation as part of its execution model

PROJECTS

- **raft** – A performant distributed consensus algorithm; based on Diego Ongaro's thesis paper
- **mqueue** – Constructed an in-memory Kafka-esque message broker in Go over an HTTP API

Other notable projects: **lispy**, **gcache**, **go-workerpool**, **pRSA**, **fzysearch**, **airport**
